MANAGING YOUR CYBER LIABILITY RISKS

Risk management can be defined as *a process of protecting you and your organization by minimizing the frequency and severity of claims and their adverse effects.*

WEDNESDAY APRIL 3, 2013 8:30-NOON

LOCATION: MVCC- 1195 E. ALEX BELL ROAD, CENTERVILLE, OH

Featuring

CHRIS BOMAR

Cyber and network security breaches have become an increasing liability for public entities. The vast majority of municipalities keep sensitive personal information on their computer systems – names, addresses, social security numbers, driver's license numbers and other data that identifies customers or employees. If this sensitive data falls into the wrong hands via a network security breach, it can lead to fraud, identity theft, or similar cyber-crimes.

The goal of this training is to learn how to reduce risk of data loss, disaster recovery and business continuity. We will cover high level technical aspects of data security and cyber risk for municipal government administrators. This course will include how to conduct a data security risk assessment, how to appoint a data security program coordinator, cyber liability and best practices.

The session covers many areas of concern including:

- Data Risk Management 101**
 - **Continuity Planning/Disaster Recovery**
 - **Risk Assessment Techniques**
 - **Federal and State privacy mandates**
- Effective Safeguards**
 - **Employee Training**
 - **Steps to Minimize Risks**
 - **Dealing with Breaches if They Occur**
 - **Data Protection/Safe Harbor Methods**
- Impact on Administration**
 - **Insurance Solutions**
 - **Benefits of Proactive Risk Management**
 - **Consequences of Lax Risk Management**

Who should attend: City Administrators, Risk Managers, IT Managers, Network Administrators, Dept.Heads.

Presenter: Christopher D. Bomar is the President and Founder of Boomarang Online Data Backup and Security. Mr. Bomar is an author, speaker and consultant on data security.
